Dear Mr. Anderson,  
Thank you for your inquiry. We do not have a manufacturing facility in Madison, this is the Corporate Headquarters for Remington. If you wish to take advantage of the Safety Modification Program you will need to send your firearm to our factory or a Remington Authorized Repair Center. This is a voluntary program, it is not a recall. This is designed to remind people of the existence of the bolt-lock feature and to offer customers the opportunity to modernize their products. If you have a bolt lock safety, we strongly recommend that you take advantage of this offer.

You can read more information regarding our firearms and our Safety Modification program through the front page of our website or the link below:

[http://www.remington.com/safety\\_modification\\_program/remington\\_safety.htm](http://www.remington.com/safety_modification_program/remington_safety.htm)

The safe use and performance of your firearm depends on correct assembly and routine maintenance, as well as adherence to the "10 Commandments of Firearm Safety." <http://www.remington.com/support/10comm.htm> It is critical that you familiarize yourself with the information in both the owners manual and safety booklet. Whether you are a veteran shooter with a collection of Remington firearms, or a first time shooter, take the time to review this important literature and be certain that you are practicing firearm safety!

If you have any questions, please feel free to contact us at 1-800-243-9700 or 1-877-387-6691.

There is a Rimington manufacturer in Madison, NC. Can I hand carry my firearm to their location for the repair on the safety? If not can you give me an address where I can mail it? I live in King, NC about 25 miles from the Madison location.
