Dear James,

Thank you for your inquiry. If you have a bolt lock safety, you can have it changed to a non bolt lock safety per our Safety Modification Program. This is a voluntary program, it is not a recall. This is designed to remind people of the existence of the bolt-lock feature and to offer customers the opportunity to modernize their products. We strongly recommend that you take advantage of this offer.

You can read more information regarding our firearms and our Safety Modification program through the front page of our website or the link below:

http://www.remington.com/safety_modification_program/remington_safety.htm

The safe use and performance of your firearm depends on correct assembly and routine maintenance, as well as adherence to the "10 Commandments of Firearm Safety." <http://www.remington.com/support/10comm.htm> It is critical that you familiarize yourself with the information in both the owners manual and safety booklet. Whether you are a veteran shooter with a collection of Remington firearms, or a first time shooter, take the time to review this important literature and be certain that you are practicing firearm safety!

If you have any questions, please feel free to contact us at
1-800-243-9700 or 1-877-387-6691.

can i still get my safety repaired or replaced so i dont have to put it on
fire to load or unload the firearm I have had trouble in the past also is
remington planning on making a lefthanded .280 in a model 700BDL anytime
soon
I would love to have one.
