Response (S. Nations)

Dear John:

Welcome to Remington Country! We are sorry to hear of your misfortune but we are glad that it didn't weaken your resolve to shoot. The Model 40 XB KS is produced in the custom shop and it does come in a left handed version. It would not be a possibility to purchase a right handed firearm and use a left handed stock with it. Thanks for your inquiry. Have a great day!

Customer (winfield wallace)

My friend Rich Barber's son was killed in an accident with a model 700. I know some kind of upgrade to the trigger/safety was offered to model 700 owners; I would like to send my 270 in to have this upgrade made. Could you please tell me how to go about this and exactly what would be done. This is my favorite rifle and have killed many deer, elk, and antelope with it as well as a mountain goat.
thanks winfield wallace
