Thank you for contacting Remington Country. Remington does not offer repair or reconditioning on discontinued models, however the following Remington Repair Center specializes in reconditioning.

Craig Colabaugh Gunsmith, Inc.
R.D. 4 Box 4168- Gumm Street
Stroudsburg, PA 18360

His firearm may have been involved in a recall. In addition, the rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. we are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

http://www.remington.com/Safety_Modification_Program/remington_safety.htm

Phone: 570-992-4499

my father of 80 plus has informed me that 1 of his rifles is a model 600. i don't live nearby him by and saw the rifle once. it is chamber in 223 1 of the sought after guns. however he had the rib removed. i believe it looked like someone filled some spots in with solder. how hard is it to replace the rib ? do you have 1 i can purchase? do you do this type of work ? if so, how much would you charge ? we have a gunsight but don't know if he is capable.
