Thank you for contacting Remington Country. Your Model 700 was manufactured around 1975. Your firearm has not been involved in a recall. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

To whom it may concern,

I am glad to say that 2 of the three guns I own are remington. Although I have only been shooting/hunting for about 4 years I am very satisfied with my remington rifles.

I am proud to say, I have just purchased a used BDL 700 in 7MM Rem. Mag. My question to you is, how can I find out the year in which my gun was manufactured? Any additional information that you may have about this year/model would be very much appreciated (eg. safety concerns, differences from a new BDL).

Thank You,
Brian
