Dear Val:

Thank you for your response. We would encourage you to review the information on our homepage in the Safety section referencing the "Safety Modification Program for pre-1982 Firearms".

Dear Sirs: Thank you for the information. This rifle was given to me as a high school graduation present in 1979. I have used it to take numerous Texas white-tails & have never had a problem but was always interested in just how old it was. Thank you for making such a fine product & with 25 years of personal pleasure, I don't think I'll EVER change from a Remington.
