Response (Chris)
Dear Mr. Wirtz,

7/29/2003 9:25:30 AM

Your Model 700 was produced in 1983. It has not been involved in a recall but would have had the bolt-lock originally. If you would like to have the bolt-lock removed, follow the instruction listed at:

http://www.remington.com/Safety_Modification_Program/remington_safety.htm

<DIV></DIV>>Response (Chris) - 07/28/2003 04:10 PM

<DIV></DIV>>Dear Mr. Wirtz,
<DIV></DIV>>

<DIV></DIV>>Thank you for contacting Remington Country. Your rifle may
have been originally installed with a bolt-lock, which means you have to
put the safety switch on fire before you can open the bolt. We can check
if you will forward the serial number on the left-hand side of the action.
We are offering a conversion at a special price if you would like your
firearm converted, so that you can open the bolt at anytime with the
safety on safe. To view more details regarding this modification, go to:

<DIV></DIV>>i'd like to know if my 700 bdl is among the group that has
a safety issue. when i clean my gun i have to fiddle with the safety to
open the bolt or something to that effect. what was/is the problem? will

it mis-fire? i know it's not right. i think i purchased it new in the early /mid 1980's. i booked a hunt in early october and need to know if i have time to get this resolved. thanks, tim wirtz
