Thank you for contacting Remington Country. Your Model 700 was produced in 1963. Your firearm has not been involved in a recall. We recommend discontinuing use and taking the firearm to a Remington Authorized Repair Center for inspection. You can find a listing of the repair centers at:

<http://www.remington.com/repairsvc/modelselection.asp>

Your rifle was originally installed with a bolt lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

http://www.remington.com/safety_modification_program/remington_safety.htm

I've had this gun discharge as I took the safty off and understand there is a recall on this problem. If so, how do I get the repaire done?
