Thank you for contacting Remington Country. Your Model 700 was produced in 1973. Your firearm has not been involved in a recall, however with the problem you are having we recommend discontinuing use and sending it to a Remington Authorized Repair Center.

<http://www.remington.com/repairsvc/modelselection.asp>

Your rifle was originally installed with a bolt lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

With the saftey on I can pull the trigger and release it, switch the safety to fire and the gun fires. Is there a recall on this gun? I also have a 700 pre 82 with the locking bolt, where do I get the boxes needed to ship them ?
