

Gun fired By itself

Discussion Thread

Response (Chris)
Dear Mr. Barsky,

11/6/2003 4:52:33 PM

We apologize for the inconvenience. Your rifle may be installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

http://www.remington.com/Safety_Modification_Program/remington_safety.htm

If in the US, we recommend discontinuing use and taking/shipping the firearm to one of the following Remington Premier Repair Centers for inspection.

Bolsa Gunsmithing
7404 Bolsa Ave.
Westminster, CA 92683
Phone: 714-894-9100
Fax: 714-898-9164

I have a major problem, I was hunting this weekend. And when I was taking out the bullets the gun fired off. I did not have my finger any where near the trigger. All I did was pull the bolt back and one shell came out and when I pulled the bolt in to release the second bullet the gun when off.

I check the gun out when I got back to camp. Noticed when the gun is in saftey the bolt does'nt move. I check with all my friends they have 700 bdl like this gun and they can remove the shells with the saftey on. when I got home tonight, I also check my 700 Bdl 30 06 and with the saftey on my bullets eject. I'm affraid to touch this gun now, what do I do?

The is 700 Bdl 300 win mag, I need answers.

Thank You
Alan Barsky
