Customer (Keith Prentice) 12/3/2003 9:11:54 PM
I just bought the model 700 and it comes with the new safety mechanism that is set with a "J" key. My brother closed the bolt and turned the key to the "white" safety on and pulled the trigger. Now I can't get the safety to unlock so I can get the bolt out.
What do I do to get the bolt out and will this hurt the gun? I have read through the instruction manual and all it says is never engage this when the bolt is chambered closed. It doesn't say how to unlock it or what, if any, damage it will do.
I appreciate your assistance as I love this new rifle and am very upset about this.

Regards,
Keith Prentice
