Dear Ron,

Thank you for your inquiry. The factory will not sell the part you are looking for. However, you may wish to check with an obsolete parts dealer to see if they have any. The link below will furnish you with a list.

I need a new sear engagement screw for a 700 long action trigger. The one in the gun was stuck and is quite messed up now, but is out. let me know a cost and I will send a check.

Thank You

Ron Porter
