Dear Danny,

Thank you for your inquiry. What we are offering on our pre-1982 Model 700's is an optional update on the gun. There is no safety concern. We did check the serial number of your rifle & it was made in 1993. Your rifle is not part of the update offer.

Please keep your rifle clean, well maintained, do not adjust the trigger or safety & always follow the 10 commandments of shooting safety.

Customer (Danny Bowen)

I saw on your website in the safety section that Remington 700's manufactured before 1982 needed a repair to the bolt lock system. My rifle is used as a Sniper Rifle for our Police Department, so it is imperative that it function perfectly. I have never had any problems, and let's keep it that way. My serial number is C6780183. If you can advise if this rifle needs repair I would greatly appreciate.
