Thank you for your inquiry. Our Model 700 triggers are standard mechanical triggers. Our triggers have sear, poundage, & overtravel adjustment. However, we strongly discourage any adjustment or modification to the trigger. This may cause your gun to become unsafe. The Model Seven has the same type of trigger style as the Model 700, but the two triggers are not interchangeable.

1. Rem 700 triggers are single stage?
2. Rem triggers only have lbs and overtravel adj.?
3. Are mod 7 triggers the same as 700?
