Dear Russ,

Due to the many variables involved with valuation, we would encourage you to refer to the many publications that are available on the subject of gun values or have it appraised by a collector. Many of these books are available through public libraries or local bookstores. For your convenience we have provided a listing of the more popular books:

I am going to be purchasing a used Remington M722 chambered in .222 Rem. ser#831500. I have read that there is an issue with the safety on these rifles and that I can send it in for a safety modification. My question is does this rifle have any real collector value and will having the modification done to it change the value if so? I would also like to know what year it was made if that is possible. I have owned several Remington products and I have always been pleased with them. Thank you for any information that you can give me and for standing behind your products.

Russ
