Dear Sir or Madam:

I own a model 700 7MM mag Serial # A63482923. This is the one of the most accurate guns I own (if not the most accurate). I have know about the safety problem and have resisted having the it fixed because my closest factory store is Williams in Flint, Mi. I have used these people on a couple of other rifles for some minor work and have been less than satisfied. Can you send to me (or a gunsmith of my choosing) the repair procedure and the necessary parts required for this repair? I purchased this rifle brand new and have owned it for about 30 years and do not want to give it to Williams to repair.
Thank you
Jim Ross
