Thank you for contacting Remington Country. According to the serial number you included, your 700 was produced in 1986. Your model has not been involved in a recall and does not have a bolt lock safety.

If you have any problems or want to have it cleaned, we recommend the following Remington Authorized Repair Centers.

Hi, I have the above Gun and we understand that there was a recall regarding the safety. We never received any information and would like to know if there was a recall and if so, how do we go about getting the gun fixed.

Thank you very much.
