Thank you for contacting Remington Country. We will need the serial number to check for call backs on your rifle. If it has had the trigger inspected for this call back, it would have a "V" stamped on the trigger.

You can take or send your firearm to a Remington Authorized Repair Center or our factory for evaluation.

You can locate your nearest repair center by visiting the Repair Information Center in our Support Section and selecting your model and state:

<http://www.remington.com/repairsvc/ModelSelection.asp>

I just got a Mohawk 600 in 308 cal handed down to me. I do not think this gun has been out of my uncle's gun safe in the last 20+ years. Doing some research I see that Remington had a recall for a defective safety at some point.

My first question is, how do I find out if my gun has been repaired according to the recall? Once I find out that it has not been repaired where do I take/send it and at what cost to me?

Thank you for taking the time to help me, by the way this is my 13th centerfire all Remingtons!
