Thank you for your patience. We have received several suggestions similar to yours and appreciate you taking the time to write in. We routinely forward all suggestions to our marketing departments for review. Consumer feedback allows us to understand consumer perception of our products. The greater the number of suggestions for a particular issue, the greater the likelihood of implementing the suggestion.

I own several 700's. I'm left handed. My favorite 700 is a left handed 7mm Rem Mag that will shoot 1/2" groups @ 100 yds. It has a bolt lock safety which I much prefer. Another 700 I own is a 308 Varmint synthetic, also very accurate, but no bolt lock. I use an improvised bolt lock consisting of a black nylon cord tied around the rear scope ring base which can just loop around the bolt handle. ? why not a 3 position safety with bolt lock?
