Dear Mr. Williams,

Thank you for contacting Remington Country. We would need the serial number to check for any recalls on your rifle.

Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. This has not been recalled. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

I purchased a model 700 BDL from you in 1981. I was told the model was recalled due to the safety and bolt assembly? You cannot unload my 700 without first taking the safety off!

Is there a recall on the gun?
