Thank you for your inquiry. To Remove Bolt Assembly:

1. Point the firearm in a safe direction.
2. Put the safety mechanism in the 'S' position.
3. Do not touch the trigger while moving the safety mechanism.
4. Raise the bolt handle.
5. Pull the bolt handle all the way back.
6. Push bolt stop release in trigger guard. 8. slide the bolt assembly from the firearm.

Just got a model 700 how do you remove the bolt for cleaning, most firearms you pull bolt to rear and pull trigger and it releases it. Help.
