

model 700 safety

Discussion Thread

Response (Chris)
Dear Mr. Beard,

11/4/2005 9:40:03 AM

Thank you for your inquiry. Your Model 700 was produced in 1973. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

http://www.remington.com/Safety_Modification_Program/remington_safety.htm

You can locate your nearest repair center by visiting the Repair Information Center in our Support Section and selecting your model and state:

Dear Sirs,
I recall a few years ago seeing an advertisement in a gun magazine in which Remington was notifying owners that Remington would replace the safeties on model 700s with a newer safety. The newer model safety allows the bolt to be opened without switching the safety to the "fire" position. My model 700 was purchased in 1979. Does Remington still replace the old safety with the newer version? If so, how do I go about getting this done?
Thanks,

Warren Beard
