Dear Mr. Mellstrom:

Thank you for visiting Remington Country. The old style safety will be replaced by the new style safety. This allows you to unload your firearm while it is on safe.

Additional information on the Safety Modification Program may be obtained by clicking below:

I have a model 722 and a model 721 which qualify for the safety modification program. Will the old safety lever be replaced by the current style found on the model 700 rifles? If not, would it be an option to have the new style lever installed?
