Dear Louis,

Welcome to Remington Country! There has not been a recall on our 700's only a safety modification. This only affected model 700's that were manufactured before March 1982.

I have a model 700 bought new in 1990 in 300 Weatherby. Is it ok to shoot factory ammo and has there been any recalls on this gun. I have never fired it and plan to use it this fall. Thank you. Louis D'Amico.
