Thanks for visiting Remington Country! We appreciate your interest and support of Remington products!

Model 700 SPS Stainless offers the bead blasted 416 stainless steel barreled action comes clean without sights and is drilled and tapped for scope mounts. For added corrosion resistance the internal fire control components are plated.

Model 700 XCR offers Remington's proprietary new TriNyte™ Corrosion Control System to make the Model 700 XCR virtually impervious to even the most extreme conditions. The TriNyte System takes firearm protection further than it's ever been before by using proven corrosion-fighting materials and an innovative, state-of-the-art application process. The result is a finish that provides scratch and corrosion resistance far superior to stainless steel alone and better than any other gun on the market.
