John,  
I am sending two SPL DAT trigger assemblies to your attention via UPS Next Day Air. They are guaranteed to arrive by 10:30 am tomorrow morning (7/24). Both trigger assemblies have quite a few rounds on them - please return them to me when you are done.

The attached PowerPoint presentation describes how the SPL trigger assembly works and the differences between the SPL and the current production trigger assembly. Please feel free to call me if you have any questions.

Jim
