**Remington® Expands the Core-Lokt®
Ultra Bonded Slug Family**

Madison, NC – The accuracy, down range ballistics and proprietary bonding process of Premier Core-Lokt Ultra Bonded Slug results in the most deadly high performance shotgun slug in the industry.

New for 2003, to complement the successful 12 gauge offering, Remington is providing a 260 grain, 20 gauge version for those who prefer the low recoil of a smaller gauge slug. The Remington Premier Core-Lokt Ultra Bonded Slug will surely become the new small gauge standard in shotgun sabot slugs.

The sleek ogive design generates some of the highest down range velocities and retained energy achievable in fully rifled barrels while providing flatter trajectories than other shotgun slugs. The bonded, jacketed slug and patented spiral nose cuts create consistent 2X expansion over a wide range of velocities with superior weight retention.

Offerings for 2003 are as follows:

Remington® Premier® Core-Lokt® Ultra Slug

	Gauge	Shell Length	Wt. Slug	Muzzle Velocity	Muzzle Energy
	12 ga.	2 3/4"	335 gr.	1900 fps Muzzle Velocity	3086 ft-lbs. Muzzle Energy
New	20 ga.	2 3/4"	260 gr.	1900 fps Muzzle Velocity	2085 ft-lbs. Muzzle Energy
