

Universal Bolt Disassembly Tool

For all Remington Model 700's

*1 ring end works for all previous model 700 rifles
*2 ring end works for model 700 rifles that are equipped with the new Integral Security System (ISS)

- Align notch in tool with bolt as shown
- Push tool all the way onto bolt plug
- Rotate tool approximately 90 degrees while holding bolt in place with hand. Hold bolt firmly!
- With other hand "rock" tool downward which will slide firing pin head back out of notch in bolt assembly
- Unscrew firing pin assembly out of bolt assembly

*Note: Do not remove tool from bolt until reassembled!
