CAD Images

Jay,

I am over-nighting to your attention 20 color glossy prints of images in support of:

- M/700 EV (5)
- Electric Primer (2)
- M/300 IDEAL (6)
- Common F.C. Lock (2)
- M/700 Lock (2)
- M/11-87 Super-Mag. (3)

These should be identical to the last images that you reviewed for the various models. I am also attaching the latest MS Word document that contains these pictures with this e-mail. I will dump these files along with the actual picture files(TIF) to a ZIP disk and send this on to Coley DuPont at Riverbend. These files should go out today or tomorrow as well. I will also send CAD files (DXF) to Riverbend for the above. These will give them the ability to do animations, fly-throughs, etc. in support of the new

product introductions. These CAD type files will not go out until next week.

With this I believe we have completed at the work that was asked of us. Please call if you have any questions.

Scott Franz R & D Technology Center E-town, KY
