TO: ALL RESEARCH PERSONNEL

FROM: J. W. BROOKS *JWB*

On Friday, February 26, 1982 the Plant will remove from the Production area and the Custom Shop all safety assemblies with the bolt lock arm. They will be delivered to Arms Service. All new trigger assemblies will have the bolt lock removed.

Beginning February 26 all Model 700 rifles (Right and Left Hand) 40XB, 40XC, 40BBR and 40XR rifles that are returned to Production should be tagged to identify them if they have a safety with the bolt lock arm.
