

## HISTORY OF LUBRICATION INSTRUCTION

Rev. 2/72

ACTION CARE AND DISASSEMBLY - Clean bolt and action in solvent and wipe clean.

Rev. 2/72

Your Remington Model 700 will remain clean longer if little or no oil is used on parts of action. Wash action and bolt parts with a good grade of petroleum solvent, dry and re-oil very lightly.

1979 - Letter to Mr. Benjamin - Use no lubrication on fire control.

Rev. 9/80

### TO CLEAN THE ACTION

5. Clean the action with a gun cleaning solvent and dry with a cloth.
6. Apply a thin coat of oil to prevent rust.

Rev. 12/82

### TO CLEAN THE RECEIVER AND TRIGGER ASSEMBLY

5. NOTE: Clean the receiver and trigger assembly as a unit with DuPont Teflon Wet Lubricant only.
6. Spray the receiver and the four points of the trigger assembly with DuPont Teflon Wet Lubricant (See Picture 11). Let stand for 15 minutes. Spray again to wash off components. Shake off excess lubricant.

WARNING: Excessive use of a non recommended lubricant could cause serious function problems possibly leading to accidental firing.

12/82

### TO ASSEMBLE THE MODELS WITHOUT A FLOOR PLATE

6. WARNING: After cleaning the trigger assembly, check the chamber and magazine to make sure there are no cartridges in the firearm. Put the safety switch in the "F" position. Close the bolt smartly. The firing pin must remain cocked. To check, pull the trigger. The firing pin must fall. Repeat the test at least ten times. If the firing pin will not remain cocked when the bolt is closed smartly, return the firearm to the factory, or a REMINGTON RECOMMENDED GUNSMITH.

Rev. 6/86

## LUBRICATION AND MAINTENANCE

### LUBRICATION:

Over-lubrication should be avoided at all times. A thin coat of Rem™ Oil is all that is needed to prevent the possibility of rusting. See note below.

When the firearm is to be stored, it should be carefully cleaned and thoroughly oiled. Outside surfaces should be wiped with a light coat of Rem™ Oil occasionally.

NOTE: Remington Rem™ Oil with DuPont Teflon Wet Lubricant is available from your local dealer. If your dealer is out of stock, ask him to order Rem™ Oil from his Remington distributor.

Rev. 6/86

### TO CLEAN THE RECEIVER AND TRIGGER ASSEMBLY

5. NOTE: Clean the receiver and trigger assembly as a unit with Rem™ Oil.
6. Spray the receiver and the four points of the trigger assembly with Rem™ Oil (see Picture 11). Let stand for 15 minutes. Spray again to wash off components. Shake off excess lubricant.

WARNING: Excessive use of a non-recommended lubricant could cause serious function problems possibly leading to accidental firing.

GUNSMITH MANUAL - When repairing trigger housing assembly wash parts thoroughly with a petroleum solvent. An accumulation of gun oil or dried oil can build a film that may cause malfunctions. Relubricate with a dry lubricant and reassemble.
