## MODEL 700 OWNER'S MANUAL

This is to confirm our recent telephone conversation wherein it was decided to modify the instruction concerning the unloading procedure found in our current Model 700 Owner's Manual, copy of which is attached. The first six (6) sentences of the unloading instruction should be deleted and the following substituted therefor:

"TO UNLOAD - Hold rifle with muzzle pointed in safe direction. Move safety to OFF SAFE position and raise bolt handle. Move safety to ON SAFE position and pull handle rearward. Grasp cartridge and remove from action. Push bolt forward until next cartridge is released from magazine. Repeat until magazine is empty. CAUTION: Safety will be in the fire position during part of this operation, so keep muzzle pointed in safe direction."

During the time it will take for the Owner's Manual to be modified, an insert entitled "Alternate Unloading Procedure", containing the substance of the foregoing modification, should be packed with the current Manual.

RBS/rk Attachment R. B. Sperling
