Dear Sirs:

I have a Model 700 BDL 270 caliber
rifle. I purchased it this year but have
had some trouble. First the bolt would
not pull the shells so I had it worked on.
Now I have a much larger problem. Since
now I have taken the safety off and the
gun has fired. The first time I thought
it was an accident on my part. Luckily
the gun was pointed straight in the air.
Second time it went off it shot a hole
through my car. This was some time later.
I don't use it much since the last accident.
It has only done this twice but I would
know where it if it will do it again. Your
time will be appreciated.

Dear Jack,

We have completed our examination of the above subject Model 700,
which was returned to us by Mr. Tony Varnum.

For completion of your files, we are attaching a gun examination report,
and the customer's correspondence. There were no photographs taken
of the arm.

Due to the customer's reference of a product liability, we will hold
the above and await your reply as to its disposition.

Best regards,
