Model 710™. Legendary Accuracy, Remarkable Value.

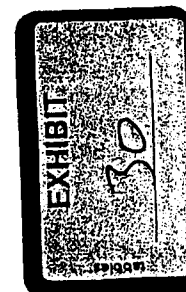

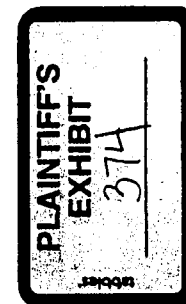

[Overview](#) [Specifications](#)

Much like the Model 700™, the Model 710™ possesses exceptional out-of-the-box accuracy, time honored reliability, crisp, single-stage trigger design, ultra-fast lock time, and the famous "three-rings-of-steel" for superior action strength. But while much of the Model 710's base design is owed to its heritage, its real story starts with advancements made possible through the latest technology. Built in America's newest firearms plant - through state-of-the-art manufacturing systems - the Model 710 breaks new ground for firearms engineering and production.

Model 710™ Features

- ▶ Three locking lugs lock bolt directly into the barrel for unprecedented action strength.
- ▶ 60-degree bolt throw for fast follow-up shots.
- ▶ Six-groove button rifled barrel.
- ▶ Single-stage trigger boasts famous Remington, bolt-action rifle 3-millisecond lock time.
- ▶ 4-round detachable magazine box for convenient loading (3-round on Magnum models).
- ▶ Rugged all-weather synthetic stock.

Principle among its many remarkable features is its innovative rugged barrel lock-up design and, all-new for 2005, a solid steel receiver for easier bolt operation. A shorter, 60-degree bolt throw allows for faster follow-up shots. Beyond the superior mechanics, the Model 710 features a uniquely textured gray synthetic stock with cheekpiece. The Remington Model 710 is more than a remarkable value, it's truly a remarkable gun.

- Equipped with mounted Bushnell® Sharpshooter™, 3-9 x 40 scope, bore-sighted from the factory.
